Functional Description

The PFL100 is an EMI filter designed to meet conducted and radiated emissions per CS01, CE03 per MIL-STD-461-E and FCC class A and B. The PFL100 is packed in a 0.80" x 1.25" x 0.4" metal case and operates from -40° to 100° C without derating. The filter is designed to filter EMI emissions. For example, it can be used with 25SXX/XX (25W), EBL30SXX/XX (30W) or 35SXXX/XX (35W) converters to offer an inexpensive solution to reduce noise compared to hybrids.
