

MQF500E SERIES 500 Watts

### **KEY FEATURES**

- Enclosed Medical Switching Power Supply
- Remote ON/OFF Function
- Standby 5V@1A
- High Efficiency up to 92%
- With P.F.C. Function >0.94
- Ultra Compact Size: 5.5 x 3.25 x 2.48 Inches
- 3-Year Product Warranty

# **ELECTRICAL SPECIFICATIONS**

All specifications valid at normal input voltage, full load and +25°C after warm-up time unless otherwise stated.

#### NOTE

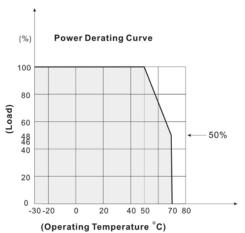

- 1. This product is not designed for use in critical life support systems, equipment used in hazardous environment, nuclear control systems or other such applications which necessitate specific safety and regulatory standards other the ones listed in this datasheet.
- 2. Ripple & Noise are measured at 20MHz of bandwidth with ceramic 0.1uF & chemi-con KY 47uF parallel capacitor.

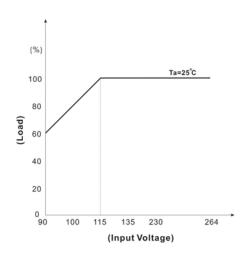

A 30cm twisted pair of no.18 AWG copper wire is connected to a 47uF and 0.1uF capacitor of proper polarity and voltage rating. The oscilloscope probe ground led should connect right to the ground ring of the probe and be as short as possible. The oscilloscope bandwidth should be at 20MHz and connected to AC ground.

- 3. Hold-up Time measured at 90% Vout.
- 4. Main Vout >3% Load, 12V (Aux) / 0.3A., 12V (Aux) need 0.1A Minimum Load, Auxiliary voltage output ground 10.2~13.3V
- 5. Strongly recommend to conduct this test with DC Voltage. If customer wishes to test with AC Voltage, please disconnect all Y-Capacitors within Arch power supply.

### **FUNCTION DESCRIPITON of CN1**

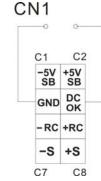

| Pin No. | Function | Description   |
|---------|----------|---|
| C1      | -5VSB    | This pin connects to the negative terminal(-V). Return for DC-OK and -RC signal output.   |
| C2      | +5VSB    | Stand by voltage output ground 4.2~5.5V, referenced to pin C1(-5VSB). The maximum load current is 1A with Fan, 0.4A without Fan   |
| C3      | GND      | This pin connects to the negative terminal(-V). Return for DC-OK and -RC signal output.   |
| C4      | DC OK    | DC-OK Signal is a DC output, referenced to pin C3(DC-OK GND).   |
| C5      | -RC      | This pin connects to the negative terminal(-V). Return for DC-OK and -RC signal output.   |
| C6      | +RC      | Turns the output on and off by electrical or dry contact between pin C5 (-RC), Short: Power OFF, Open: Power ON.  |
| C7      | -S       | Negative sensing. The -S signal should be connected to the negative terminal of the load. The -S and +S leads should be twisted in pair to minimize noise pick-up effect. |
| C8      | +S       | Positive sensing. The +S signal should be connected to the positive terminal of the load. The +S and -S leads should be twisted in pair to minimize noise pick-up effect. |

## **FUNCTION MANUAL & APPLICATION NOTE**

### 1. DC-OK Signal

| Between<br>DC-OK and GND | Output<br>Status |
|--------------------------|------------------|
| 3.7~6V                   | ON               |
| 0~1V                     | OFF              |

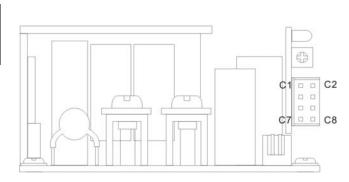

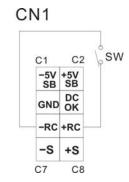

#### 2. Remote Control

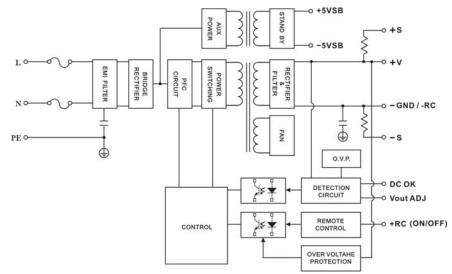

It can be turned ON/OFF by using the "Remote Control" function.

| Between<br>+RC and -RC | Output<br>Status |
|------------------------|------------------|
| SW ON (Short)          | OFF              |
| SW OFF (Open)          | ON               |
